## EDUCATION

---

|                                                                                         |                |
|-----------------------------------------------------------------------------------------|----------------|
| <b>PhD in Mathematics</b> , <i>University of Aberdeen</i>                               | 2025 - Present |
| Advisor: Richard Hepworth-Young                                                         |                |
| Project: Topology of Algebras                                                           |                |
| <b>MA Mathematics</b> , <i>University of Aberdeen</i>                                   | 2021 - 2025    |
| Degree classification: First class honours                                              |                |
| Honours project on braid groups under the supervision of Dr Mark Grant                  |                |
| Reading project on compact Lie groups under the supervision of Professor Jarosław Kędra |                |
| Reading project on algebraic topology under the supervision of Baylee Schutte           |                |
| <b>Secondary School</b> , <i>Mensa gymnázium, Prague</i>                                | 2015 - 2021    |
| Maturita (equivalent to A-levels) in Mathematics, Philosophy, English, and Czech        |                |

## RELEVANT EXPERIENCE

---

|                                                                                               |                        |
|-----------------------------------------------------------------------------------------------|------------------------|
| <b>Tutoring</b> , <i>University of Aberdeen</i>                                               |                        |
| Analysis II                                                                                   | Spring 2026            |
| Algebra                                                                                       | Autumn 2025            |
| Set Theory                                                                                    | Spring 2025            |
| Combinatorics                                                                                 | Spring 2025            |
| Analysis I                                                                                    | Autumn 2024            |
| <b>EMS Student Research Bursary</b>                                                           | May - September 2024   |
| Summer research project: "Poset of abelian subgroups, generating tuples and Möbius Inversion" |                        |
| Supervisor: Dr Irakli Patchkoria                                                              |                        |
| <b>Reaching Higher Mathematics - Programme Tutor</b> , <i>University of Glasgow</i>           | June 2023 - April 2024 |
| Preparing secondary school pupils for Advanced Higher Mathematics in online tutoring sessions |                        |

## HONOURS AND AWARDS

---

|                                                                                                      |      |
|------------------------------------------------------------------------------------------------------|------|
| <b>Honours Prize in Mathematics</b> , <i>University of Aberdeen</i>                                  | 2025 |
| Most distinguished student for Honours in Mathematics                                                |      |
| <b>Level 3 Prize in Mathematics</b> , <i>University of Aberdeen</i>                                  | 2024 |
| Best student in Level 3 Mathematics                                                                  |      |
| <b>Maclaurin Prize</b> , <i>University of Aberdeen</i>                                               | 2023 |
| Best student in Level 2 Mathematics                                                                  |      |
| <b>De Gurbs Prize</b> , <i>University of Aberdeen</i>                                                | 2022 |
| Best student in Level 1 Mathematics                                                                  |      |
| <b>Czech Secondary school Academic Activity</b> , <i>Ministry of Education of the Czech Republic</i> | 2020 |
| First place in the category of Economics with a project utilising basic econometric techniques       |      |
| <b>World Schools Debating Championships</b>                                                          | 2019 |
| Representing team Czech Republic in Thailand                                                         |      |

## OTHER ACTIVITIES

---

|                                                                  |             |
|------------------------------------------------------------------|-------------|
| <b>Secondary school Debate club coach</b> , <i>Prague/online</i> | 2016 - 2023 |
| <b>Czech Debate Association</b>                                  | 2021 - 2023 |
| Volunteer judge and motion committee member                      |             |
